003 About the Brand

Naazhi is one workspace for the days, work and thoughts of one person.

Notes, to-dos, journal, chat, calendar and a Reader live together, on the web and on the phone. An AI layer can help, and it can be swapped for another provider, replaced with your own key, or switched off.
The product is calm on purpose. It uses clean Geist typography, high-contrast ink, crisp hairline borders and flat paper surfaces, and it says what happened and what to do next.

Notes, tasks, journal

The things you write and plan.

Chat with an optional AI

Swap it, bring your own, or turn it off.

Calendar and Reader

Your day and what you follow.

Private by design

Row-level security, private storage.

004 Brand Story

நாழி

An old Tamil measure of grain, and of time. A small, honest unit you use every day.

The name **Naazhi** (நாழி, said *NAA-zhee*) comes from a measure people once used to portion out both grain and time: small, plain, trusted, daily. That is the idea behind the product. Our days are scattered across a dozen apps, and each one asks for attention. Naazhi keeps the days, the work and the thoughts of one person in one place, and keeps the loud parts quiet.

The mark is drawn the way Tamil is written: one hand-drawn line with rounded ends that curls, loops and closes into a speech bubble. It was made to feel personal, not corporate.

005 Brand Vision

A workspace that belongs to the person who uses it.

Personal first

Everything a person keeps, in one place that is theirs.

Your AI, your terms

The AI layer can change or go away. The workspace stays.

Trust by default

Private data stays private, and people can always take it with them.

Draft statement written from the product principles in docs/ARCHITECTURE.md and docs/SECURITY.md. Brand owner to confirm.

006 Brand Mission

Give everyone one calm place for their notes, tasks and days, with an AI they control.

- Bring writing, planning and reflection together so nothing is lost between apps.
- Make AI optional: swap it, bring your own key, or keep the workspace AI-free.
- Be honest about what the product does, what it costs and how data is handled.
- Work the same on the web and on the phone, in English and with Tamil in mind.

007 Brand Values

Calm
Quiet screens, short sentences, no hype words, no exclamation marks.

Personal
Hand-drawn mark, calm paper-and-ink surfaces, a voice that sounds like a person.

Private
Your data is yours, scoped in the database and exportable any time.

In control
AI is a layer you choose, swap or switch off.

Honest
Plain claims that match the security docs. We never promise more.

Accessible
Keyboard, contrast, reduced motion and 375 px screens are required.

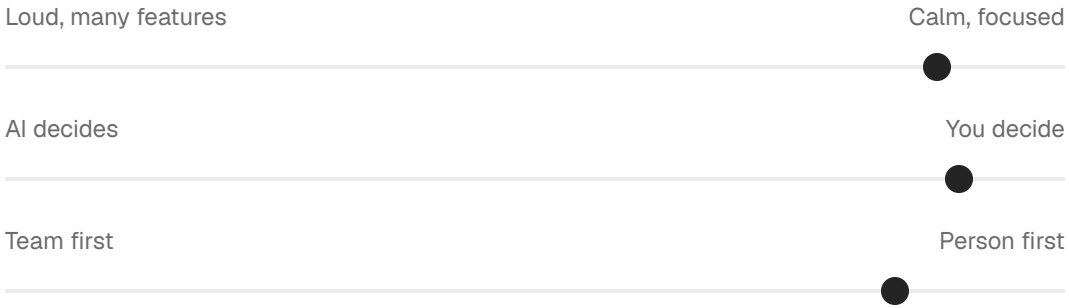

008 Brand Positioning

For people who want one calm workspace and decide for themselves how much AI is in it.

Statement

Naazhi is the personal workspace that keeps notes, tasks, journal, chat and calendar together, with an AI layer you can swap, bring your own, or switch off.

Where we sit

009 Brand Personality

If Naazhi were a person: a thoughtful friend who keeps your diary tidy and never shouts.

Warm
Friendly, plain, a little human.

Calm
Unhurried. Short sentences. Space to think.

Considered
Careful details, not clever gimmicks.

Trustworthy
Says what it does, does what it says.

Sounds like
“Couldn’t save that. Try again.”

Never sounds like
“Oops! Something went wrong!!”

010 Brand Promise

Your AI can change.
Your workspace shouldn’t.

Your content stays yours

It lives in your workspace, not inside an AI provider.

No surprises

Nothing is sent to a model you haven’t chosen. In AI-free mode nothing is sent at all.

You can leave

Export your data at any time, or delete your account in Settings.

011 Target Audience

Individuals who keep their life in text and want it in one tidy place.

Knowledge workers

Designers, developers, writers and consultants who juggle notes, tasks and a journal.

Students and researchers

Keep notes, deadlines and reading in one workspace.

Privacy-minded people

Want AI without handing their notes to a provider they didn't pick.

Tamil and English speakers

India-first (prices in ₹, Tamil name and script), open to the world.

Draft audience, written from the product docs. Validate with research before using in paid media.

012 Customer Personas

Priya, 29

Product designer, Chennai

Today Notes in one app, tasks in another, a journal on paper.

Needs Wants one calm place on her phone and laptop. Writes in English and Tamil.

Arun, 34

Freelance developer

Today Uses several AI tools and pastes client notes into them.

Needs Wants AI he controls: his own key, or none. Cares where data lives.

Meera, 41

Teacher and parent

Today Plans lessons, keeps a private journal, shares a family journal.

Needs Wants it simple, private and AI-free if she chooses.

Draft personas, not research findings. Replace with interview-based personas when available.

013 Market Positioning

Between the heavy team suites and the single-purpose apps: a personal workspace with AI that is optional.

014 Unique Selling Proposition (USP)

One workspace, any AI.

Everything you keep in one place, with an AI you can swap, bring your own, or switch off.

One workspace

Notes, to-dos, journal, chat, calendar and Reader together.

Any AI

Groq, your own key, Puter, or none. Nothing moves when you switch.

Web and phone

The same workspace on both, with home-screen widgets.

015 Brand Differentiation

	Naazhi	TYPICAL AI NOTES APP	TYPICAL PRODUCTIVITY SUITE
AI	Swap, own key, or off	One built-in model	Add-on, often paid
Where your content lives	Your workspace, private	Often tied to the AI vendor	Team workspace
Focus	One person’s days	Notes	Teams and projects
Tone	Calm, plain	Hype	Corporate
Leaving	Export or delete in Settings	Varies	Varies

General positioning comparison, not a claim about any named competitor.

016 Brand Archetype

The Sage

Knows the value of clarity. Helps you see your own days and thoughts and decide for yourself.

with a touch of the Caregiver

Looks after what you keep. Warm, protective, never pushy.

Sage in substance, Caregiver in manner. Calm authority without lecturing.

017 Brand Philosophy

Small, honest units, used every day.

Small

One thing at a time. One headline, one accent, one primary action per view.

Honest

Plain words, real screenshots, claims that match the security docs.

Daily

Built for the habit, not the demo. Fast, quiet, always there.

Yours

The person decides what connects, what AI sees and what leaves.

018 Primary Logo

The primary logo is the **lockup**: the mark on the left and the word **Naazhi** beside it, vertically centred. Use it in headers, footers, emails and covers.

Wordmark: Instrument Serif 400, tracking −0.02em, ink colour. Mark height 1.3× the wordmark size. Gap 0.35×. Never stack them in the product UI.

019 Secondary Logo

Naazhi

Wordmark alone: when the mark already appears nearby, for example a hero under a top bar that carries the lockup.

Mark alone: avatars, favicons, app icons and tight spaces. At least 16 px on screen.

020 Logo Variations

Lockup · ink on paper

Lockup · reverse on ink

Lockup · reverse on green

Mark · on white

Mark · cream version

App icon

021 Brand Symbol / Icon

One line, three ideas

The bubble with three lines

Notes, journal and chat. The things you write.

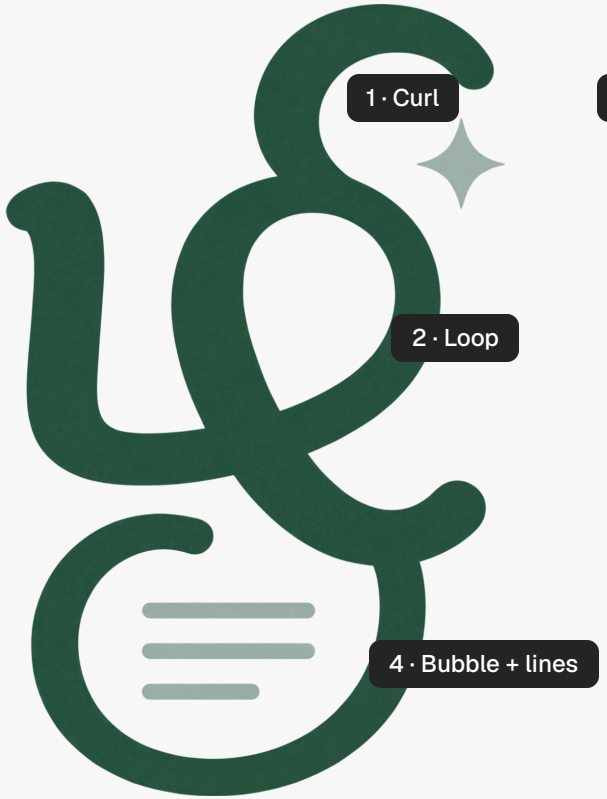

The star

The AI layer: present, small, optional.

Single weight, round ends

Calm and personal, not corporate.

022 Logo Construction

1. **Curl.** The small hook at the top, where the stroke begins.
2. **Loop.** The round counter in the middle, the heart of the shape.
3. **Star.** A four-point spark at about 40 % of the green. Never recolour it separately.
4. **Bubble with three lines.** The long tail closes into a speech bubble holding three lines of writing.

The mark is a hand-drawn master picture, processed into transparent PNGs by `scripts/brand/build-assets.mjs`. Don't redraw it from memory.

023 Logo Grid & Proportions

Wordmark	Instrument Serif 400, size **x**
Mark height	**1.3 × x**
Gap	**0.35 × x**
Alignment	Vertically centred, mark on the left
Tracking	−0.02 em

Sizes used today

Top bar (web, app)	28 px mark
Hero, shared pages	26 px
Footer	34 px
Chat welcome	40 px
Mobile launch	160 px with name below

024 Clear Space

Keep at least half the mark’s width free on every side.

The loop at the top of the mark is the unit. Nothing enters this space: text, edges of the page, photos or other logos.

In an app icon the mark fills about 66 % of the square, centred.

025 Minimum Logo Size

16 px mark

24 px mark

32 px mark

48 px mark

Mark alone, screen	**16 px** (favicon)
Mark alone, print	**8 mm**
Mark in a lockup	**24 px** high

Below about 24 px the star and the three lines blur. That is fine for a tab icon, but don’t rely on them to carry meaning.

026 Logo Color Variations

Naazhi green
#235340

Cream reverse
#F9F4E5

One colour
(themed icons)

Mark on cream
(app icon)

Ink strokes	Naazhi green **#235340**
Details (star, lines)	Same green at about 40 %
Ground	Naazhi cream **#F9F4E5**

The details get their lighter tone from the file's own transparency. Never recolour them separately. The UI uses its tokens, never these two hex values.

027 Logo on Different Backgrounds

✓ Do

- Put the logo on paper, white cards or the dark fill.
- Use the cream version on dark and on green.
- Keep 4.5 : 1 contrast between strokes and ground.

✕ Don’t

- Place it on a busy photo.
- Use a background with less than 4.5 : 1 contrast.
- Mix the ink mark with a cream wordmark.

028 Incorrect Logo Usage

✕ Don’t recolour

✕ Don’t stretch

✕ Don’t rotate

✕ Don’t add effects

✕ Don’t outline

✕ Don’t crop

✕ Don’t use low contrast

✕ Don’t put it on photos

Also never: write the name in all caps or lower case at the start of a sentence, bounce or animate the strokes apart, or use the retired mascot and ghost artwork.

029 Primary Brand Colors

White
#FFFFFF

HEX	#FFFFFF
RGB	255, 255, 255
CMYK	0, 0, 0, 0
HSL	0°, 0%, 100%

Raised surface: cards, dialogs, sheets. Token --surface / --raised.

Paper
#F7F7F7

HEX	#F7F7F7
RGB	247, 247, 247
CMYK	0, 0, 0, 3
HSL	0°, 0%, 97%

The page canvas & sidebar. Token --page / --paper.

Ink
#242424

HEX	#242424
RGB	36, 36, 36
CMYK	0, 0, 0, 86
HSL	0°, 0%, 14%

Text, headings, primary controls. Token --fg / --ink.

Hairline
#EBEBEB

HEX	#EBEBEB
RGB	235, 235, 235
CMYK	0, 0, 0, 8
HSL	0°, 0%, 92%

1 px crisp card and row borders. Token --line.

The foundation is **paper and ink**: restrained, near-monochrome surfaces with 1 px hairline borders, no shadows on cards, and no gradients or pastel washes behind whole panels.

030 Secondary Brand Colors

Coral
#E06449

HEX #E06449
RGB 224, 100, 73
CMYK 0, 55, 67, 12
HSL 11°, 71%, 58%

Warm accent: selection dots, attention. Token --coral.

Critical
#C13D3D

HEX #C13D3D
RGB 193, 61, 61
CMYK 0, 68, 68, 24
HSL 0°, 52%, 50%

Errors, destructive actions, alerts. Token --critical.

Success
#2D8A5E

HEX #2D8A5E
RGB 45, 138, 94
CMYK 67, 0, 32, 46
HSL 152°, 51%, 36%

Completed tasks, positive status. Token --success.

Overdue
#C26A1A

HEX #C26A1A
RGB 194, 106, 26
CMYK 0, 45, 87, 24
HSL 29°, 76%, 43%

Overdue items, medium priority. Token --overdue.

The logo's own green (`#235340`) and cream (`#F9F4E5`) stay preserved strictly in the logo files and app icon. The interface uses its own semantic design tokens.

031 Accent Colors

Green
bg #F0F5F0
fg #2D8A5E

Blue
bg #EDF2F5
fg #4A7085

Amber

Logo cream	`logo files only`	#F9F4E5	249, 244, 229	0, 2, 8, 2	45°, 63%, 94%

*CMYK values are straight conversions for reference. Print a proof and match by eye before a production run.

034 Color Combinations

Aa

Paper · ink
Default page canvas

Aa

White · ink
Flat cards & dialogs

Aa

Dark · on-dark
Dark panels, primary button

Aa

Paper · coral
Warm accent & selection

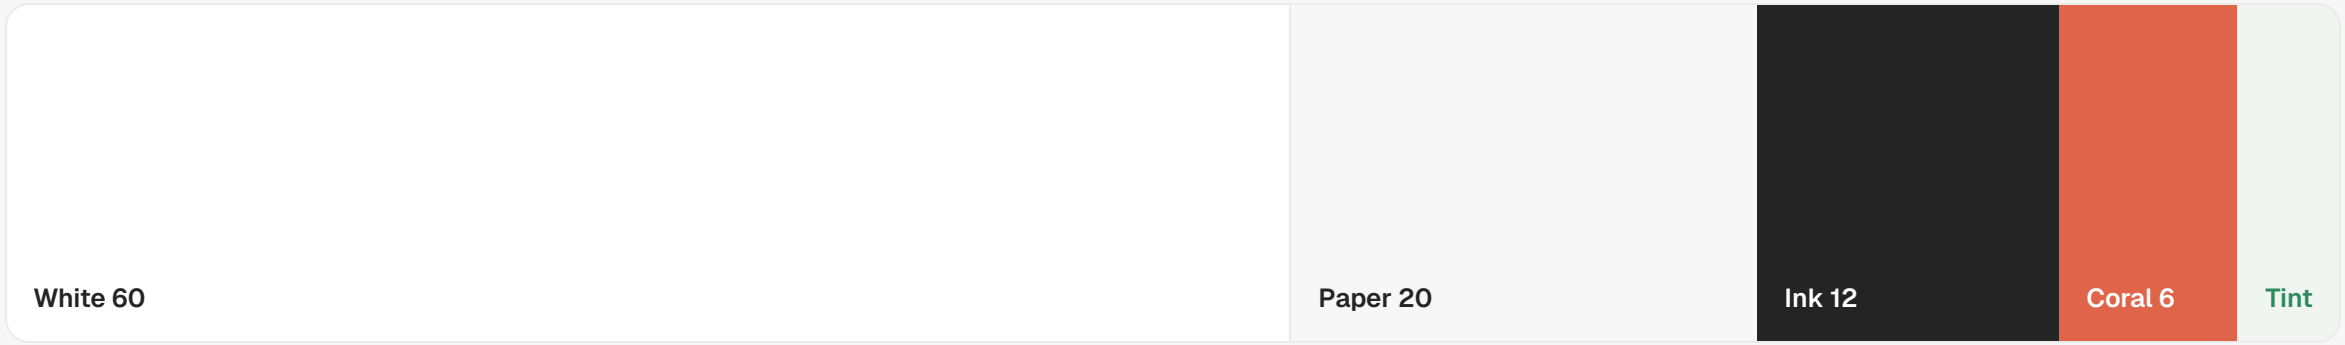

Aa

Success tint
Tasks done, positive status

Aa

Clay tint
Errors, warnings, alerts

035 Color Usage Ratio

Mostly white & paper

Restrained, near-monochrome paper surface with 1 px hairline borders.

High-contrast ink

Crisp ink headings, high-contrast readability, and rectangular dark action buttons.

Restrained accents

Coral for attention, status colours (success/critical) for feedback, tints for category chips.

A guideline for balance, not a measured spec.

036 Accessibility & Contrast

PAIR	RATIO	WCAG
Aa Ink on white	15.52 : 1	AAA
Aa Ink on paper	14.49 : 1	AAA
Aa Muted text on white	5.33 : 1	AA
Aa Muted text on paper	4.97 : 1	AA
Aa Critical on white	5.25 : 1	AA
Aa Success on white	4.28 : 1	Large only
Aa Coral on white	3.45 : 1	Large only
Aa White on dark fill	15.52 : 1	AAA
Aa Green tint text	3.88 : 1	Large only
Aa Clay tint text	4.56 : 1	AA
Aa Logo green on logo cream	8.02 : 1	AAA

Ratios are computed from the hex values. Faint and subtle text are for labels and hints, never for body copy. Colour is never the only signal: pair it with an icon or text.

037 Primary Typeface

Aa

Geist

Weights 400, 500, 600, 700 · tracking −0.022em to −0.03em for headings

The quick brown fox jumps over the lazy dog.

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789 ’ “ ” — &

Geist is the primary typeface for everything in the UI: headings, body copy, controls and buttons. Clean modernist geometry with optical balance and humanist rhythm.

038 Secondary Typeface

Aa

Instrument Serif

Weight 400 only · reserved strictly for the Naazhi wordmark

Naazhi brand mark and wordmark only.

Instrument Serif is used solely for the brand wordmark in headers, footers and covers. It is never used for general UI page titles, dialogs, cards, or body text.

Geist Mono is used for counters, code and keyboard hints: `⌘K` `12:30`

Noto Sans Tamil loads automatically for Tamil text: நாழி

039 Heading Typography

Page title · Geist 600, clamp(28px, 3vw, 42px), −0.025em

Everything you keep, in one place.

Dialog title · Geist 600, 24–28px, −0.02em

New event

Section label · Geist 11px, semi-bold, +0.1em, uppercase

TODAY

Headings are sentence case. The **quiet** class is the lower-contrast second half of a two-tone marketing heading (faint ink), not italic green.

040 Body Typography

Body · Geist 14–16 px

Naazhi keeps your notes, tasks, journal and chat in one workspace. Write something down and it is there on your phone and your laptop. Switch the AI off and nothing changes about where your words live.

Small labels · 12–13.5 px

Last edited today · 3 notes · Synced

Never below 11 px

The smallest text in the product.

Form controls inherit

Always font: inherit, so a textarea never renders in monospace.

Sentence case

“New event”, not “New Event”.

041 Display Typography

One workspace,
any AI.

Display sizes are for covers, hero sections and marketing: Geist 600–700 at 64–120 px, tight tracking, balanced lines, one quiet phrase.

042 Font Weights & Styles

Geist

Regular 400

Medium 500

Semi-bold 600

Bold 700

Instrument Serif

Regular 400 (wordmark lockup only)

Geist Mono

`Regular 400 · Medium 500`

Use Regular for body, Medium or Semi-bold for labels, tabs and buttons, Semi-bold (600) for titles, and Bold (700) for display headings.

043 Typography Hierarchy

DISPLAY

Calm by default

PAGE TITLE

Today’s tasks

MONO

`⌘K · 12:30 · UNT–49`

044 Line Height & Letter Spacing

USE	FONT	SIZE	LINE HEIGHT	TRACKING
Display	Geist 700	64–120 px	0.96–1.02	−0.035 em
Page title	Geist 600	28–42 px	1.05–1.1	−0.025 em
Dialog title	Geist 600	24–28 px	1.15	−0.02 em
Wordmark	Instrument Serif 400	any	1	−0.02 em
Body	Geist 400	14–16 px	1.5–1.6	0
Section label	Geist 600	11 px	1.3	+0.1 em, uppercase

045 Typography Do's & Don'ts

✓ Do

- Use Geist for all headings, body text, buttons and controls.
- Reserve Instrument Serif strictly for the Naazhi wordmark.
- Write in sentence case with curly apostrophes (’).
- Keep line length near 60–75 characters.

✕ Don’t

- Use Instrument Serif for page titles, buttons or body text.
- Use Title Case Buttons or ALL CAPS headings.
- Go below 11 px or use faint text for body copy.
- Add bold or italic to Instrument Serif (it has one weight).

046 Brand Patterns

Patterns are quiet backgrounds built from the brand’s own forms. They sit at low opacity behind content and never compete with it.

- **Marks**: the mark repeated on a diagonal grid at 6 % opacity.
- **Lines**: the three writing lines, repeated.
- **Dots**: a dot grid on paper for planning surfaces.

047 Graphic Elements

The spark
A four-point star for the AI layer. Small, optional, one per view.

Three lines
Writing lines from the bubble, used as dividers and bullets.

Soft glow
A blurred neutral glow behind page heroes.

Hairline grid
1 px gaps over a hairline colour for calendars and tables.

Naazhi

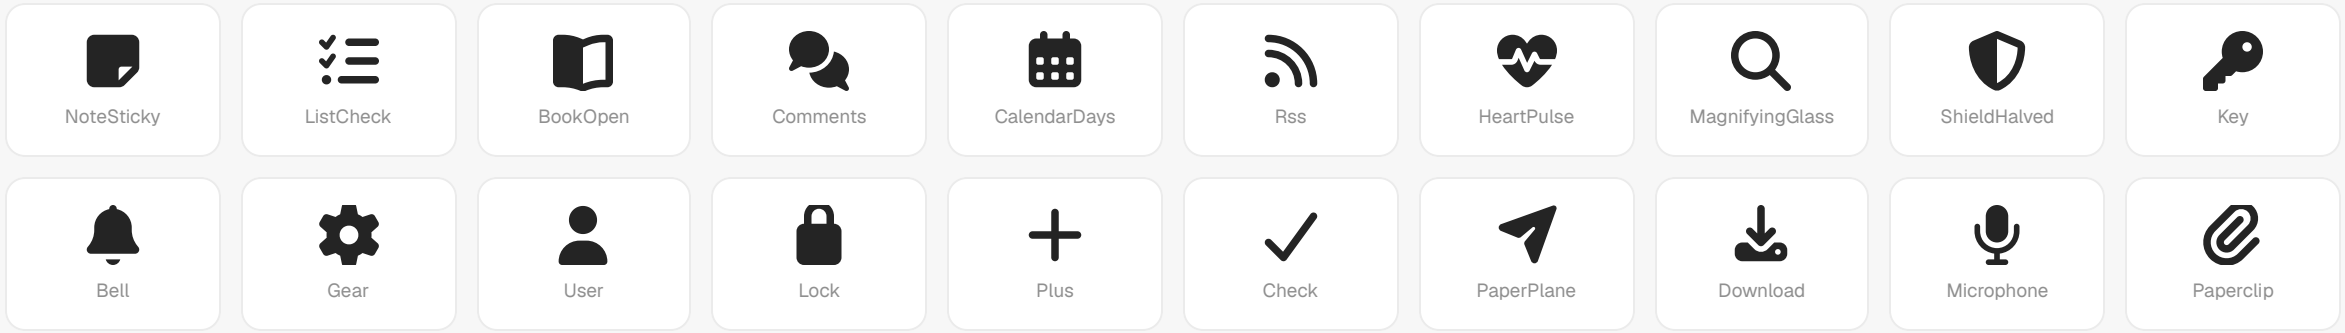

048 Shapes & Geometry

r1	r2	r3	r4	ctl
8 px	10 px	12 px	16 px	8 px

Cards use **r3 · 12 px**, dialogs **r4 · 16 px**, buttons **8 px (rounded-ctl)**. Small chips use 6 px. Controls are rectangular with subtle corner rounding.

Surfaces are flat paper with a 1 px hairline border (`--line #ebebeb`), not translucent glass. Shadows are reserved for floating layers (`shadow-pop`).

049 Iconography

Font Awesome Free, Solid only, drawn in the ink colour. No emoji in the product, no other icon sets. Icon-only buttons need an `aria-label`.

050 Illustration Style

No mascots. The product is the illustration.

Naazhi doesn’t use characters or decorative scenes. Empty states are one quiet line with the next step. When a picture is needed, use the mark, the spark and soft tinted shapes.

- The retired mascot and ghost artwork are never used.
- Flat shapes, single weight, round ends.
- Muted tints for categories, ink for lines.

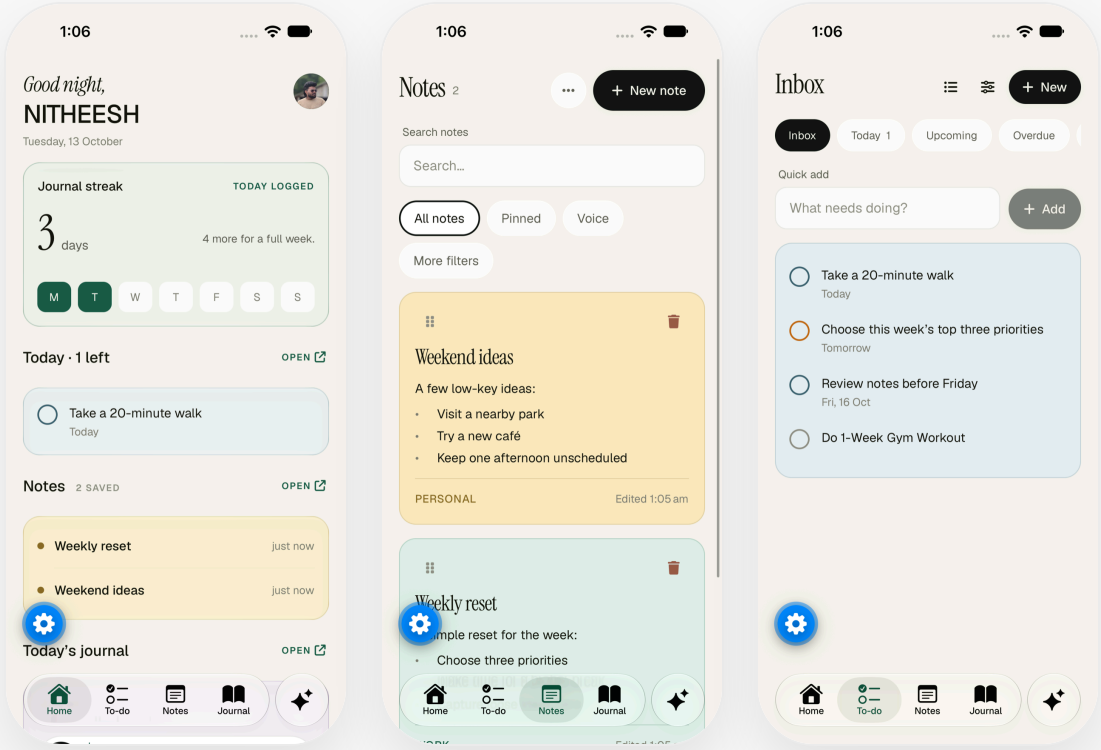

051 Photography Style

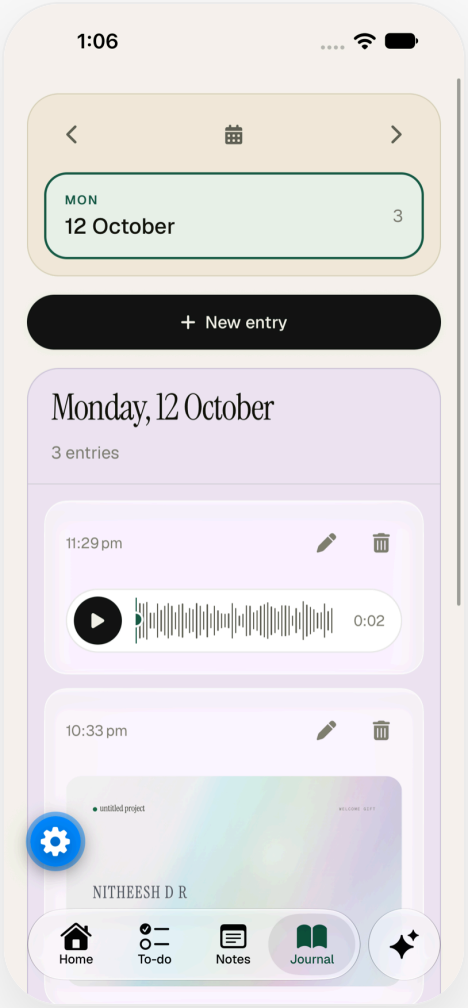

Real screens, not stock photos.

Naazhi shows the actual app, on a phone, on a clean paper ground. No stock people, no staged desks.

- Use screenshots of the real app only.
- Show them in an iPhone frame on paper or white ground.
- Keep one phone or a calm fan of three.
- If a photo is ever needed: natural light, warm, uncluttered, no filters.

052 Image Treatment

Rounded corners

Screens and cards use the radius scale: 12 px cards, phone-shaped screens.

Hairline border, not shadow

A 1 px hairline border in line colour (#ebebeb). Flat surfaces with no elevation shadow.

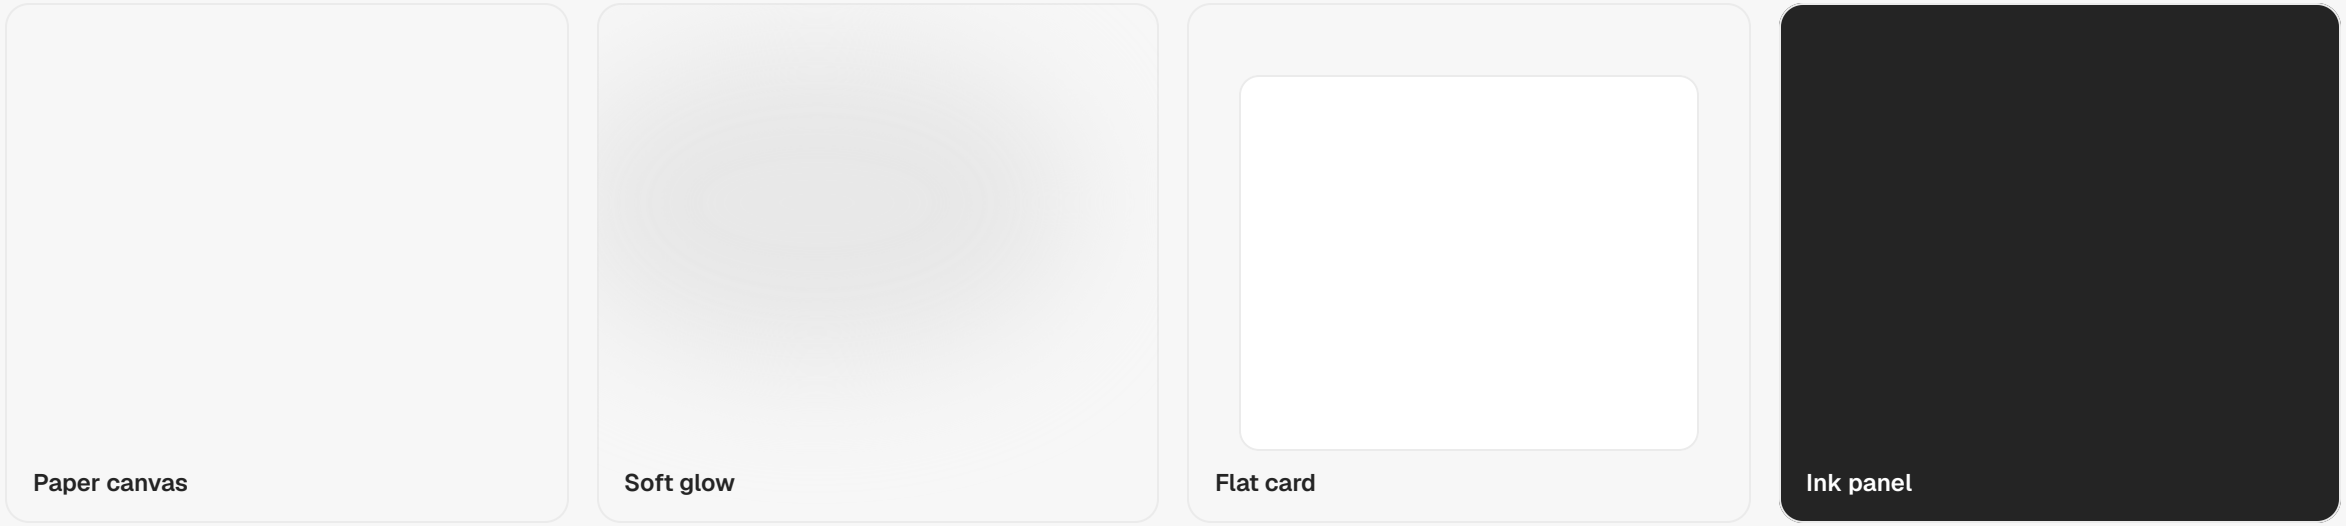

Paper ground

Place images on paper, white or neutral grounds. Never over busy textures.

No filters

No duotone, blur or heavy colour grading. Show the product as it is.

053 Background Textures

Texture is restrained: flat paper surfaces, clean white cards with hairline borders, and ink panels for dark elements. No blur, no glass, no gradients across the brand colours.

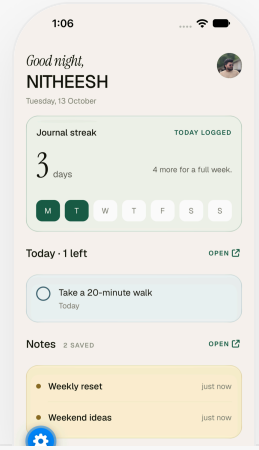

054 Visual Composition

Naazhi

One Geist headline, one idea.

One plain sentence that says what it is.

Get started

- **One idea per section**: a short headline, one plain sentence, the real app.
- **Generous space**: let the paper breathe. Margins of at least 16 px on a phone, 32 px on desktop.
- **One primary action** per view, as a rectangular dark button.
- **Align to a grid**: a 12-column web layout, a single column at 375 px.
- **Hierarchy by size and weight**, not by colour or decorative boxes.

055 Brand Voice

Calm, plain and a little warm.

Short sentences
Say what happened and what to do next.

Plain words
No hype words: “revolutionary”, “supercharge”, “unlock”.

Human
A person talking to a person. No corporate filler.

Honest
Claims match the security docs. We never promise more.

INSTEAD OF	WRITE
“Oops! Something went wrong!”	“Couldn’t save that. Try again.”
“Unlock the power of your workspace”	“Everything you keep, in one place.”
“Welcome to the future of productivity”	“Welcome to Naazhi.”

056 Brand Tone

MOMENT	TONE	EXAMPLE
Marketing	Confident, quiet	“Your AI can change. Your workspace shouldn’t.”
Onboarding	Warm, brief	“Welcome to Naazhi. Let’s set up your first note.”
Errors	Calm, helpful	“Couldn’t save that change. Try again.”
Destructive actions	Clear, serious	“Delete this event? This can’t be undone.”
Empty states	One quiet line	“No tasks yet. Add one to get started.”
Notifications	Plain sentence	“3 new articles in your Reader.”

057 Writing Guidelines

✓ Do

- Use sentence case everywhere except proper names.
- Use curly apostrophes (’) and digits for numbers.
- Name features by what they do: Plan, Journal, Chat, Workspace.
- Say “AI” is a layer you can swap or switch off.
- Format dates the way the person reads them.

✕ Don’t

- Use exclamation marks or emoji in product text.
- Write NAAZHI, naazhi or Nazhi in running text.
- Show raw error messages to people.
- Sell AI as the product, or promise more than SECURITY.md allows.
- Invent sub-brand names for features.

058 Brand Vocabulary

Words we use

workspace · keep · write · plan · journal · your · swap · bring your own · switch off · private · calm · simple · export

Words we avoid

revolutionary · supercharge · unlock · game-changing · next-gen · seamless · leverage · synergy · 10x · magic

Name	**Naazhi** (said NAA-zhee). Lower case only in addresses and file names: `naazhi.app`.
Tamil	நாழி, an old measure of grain and of time
Credit	“Backed by Setups Works.” in email footers and About. Not in the header.

059 Tagline & Slogan

One workspace, any AI.

TAGLINE

Supporting line

Your AI can change. Your workspace shouldn’t.

One-liner

Notes, to-dos, journal, chat, calendar and your Reader in one workspace, with an AI you can swap, bring your own, or switch off.

Use the tagline under the logo *or* as a page-title suffix. Not both in the same place.

060 Messaging Framework

CORE MESSAGE

One workspace, any AI.

PILLAR 1

One calm place

Notes, tasks, journal, chat, calendar and Reader together.

PILLAR 2

AI on your terms

Swap it, bring your own key, or switch it off.

PILLAR 3

Yours to keep

Private by design, exportable any time.

PROOF

Row-level security · private storage · encrypted API keys · export and delete in Settings · web and Android app

061 Social Media Writing Style

Naazhi
@naazhi.app

Your notes, tasks and journal, in one place.

Switch the AI on, swap it, or turn it off. The workspace stays yours.

Naazhi

- Open with the point, in one short line.
- One idea per post. Two short paragraphs at most.
- No emoji strings, no all-caps, no exclamation marks.
- Show the real app. Screenshots over stock.
- Hashtags: at most two, plain (#notes, #journal).
- Reply like a person: “Thanks. Fixed in 4.1.”

062 Communication Do's & Don'ts

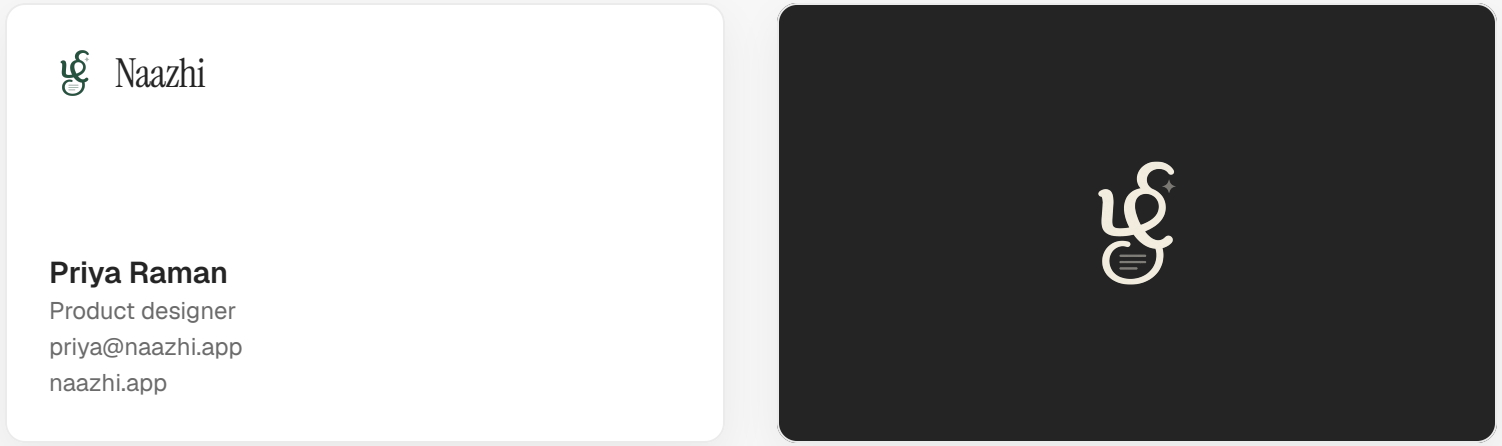

✓ Do

- Say what happened and what to do next.
- Match every privacy claim to docs/SECURITY.md.
- Show real screens.
- Credit Setups Works in footers and About only.

✕ Don’t

- Hype, emoji or exclamation marks.
- Promise AI features that aren’t built.
- Use the old working title anywhere users can see it.
- Quote customers without permission.

063 Business Cards

Size	85 × 55 mm, 3 mm bleed
Stock	Uncoated white or off-white paper, 350 gsm
Front	Lockup top left, name in Geist 600, details in Geist 400
Back	Cream mark centred on the dark fill

064 Letterhead

- A4, white or off-white (#f7f7f7) stock.
- Lockup top left at 14–16 mm, web address top right.
- Body in Geist 10.5 pt, line height 1.5.
- Footer in 8 pt muted ink, with the Setups Works credit.
- Margins: 20 mm.

065 Email Signature

Thanks,

Priya Raman
Product designer · Naazhi
priya@naazhi.app · naazhi.app

- Mark 46 px high, then name (semi-bold) and role.
- Plain text links in ink with underline.
- No taglines, quotes or banners.
- Email headers carry the lockup at 28 px.
- Footer: “You received this because someone used this address on Naazhi.”

066 Company Profile

Naazhi

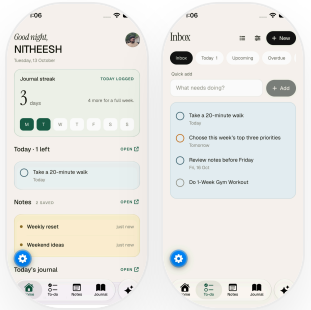

Company profile

2026

ABOUT

One workspace for one person’s days.

PRODUCT

BACKED BY SETUPS WORKS

Landscape A4 or 16:9, white or off-white pages, one idea per page, real screenshots, the ink panel for the closing page.

067 Presentation Templates

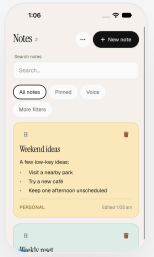

Naazhi

Title slide,
one idea.

SECTION

Three short points

Screens

Thank you

- 16:9. White or off-white background, ink text. Titles and content in Geist.
- Titles and body in Geist, wordmark in Instrument Serif.
- Real screenshots only, in phone frames.
- A dark closing slide with the cream mark.

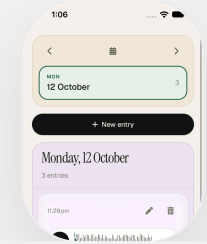

068 Social Media Templates

TIP

Write it down, then let it go.

Naazhi

One workspace, any AI.

Your journal, private.

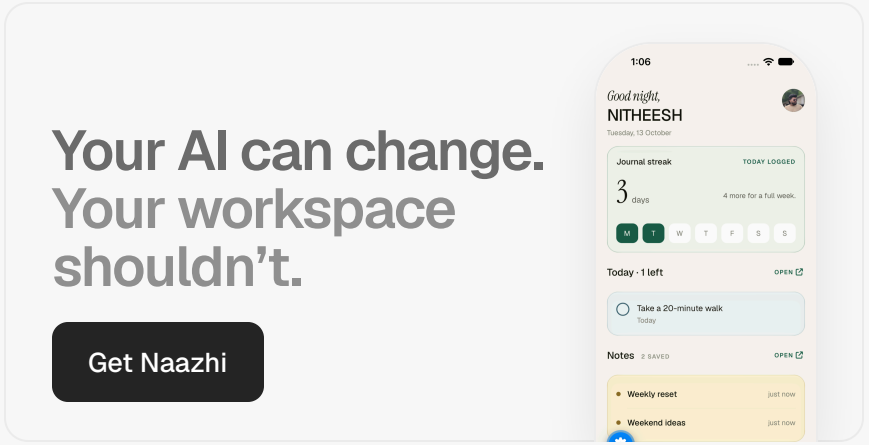

What's new in 4.2

Terms Refunds Contact

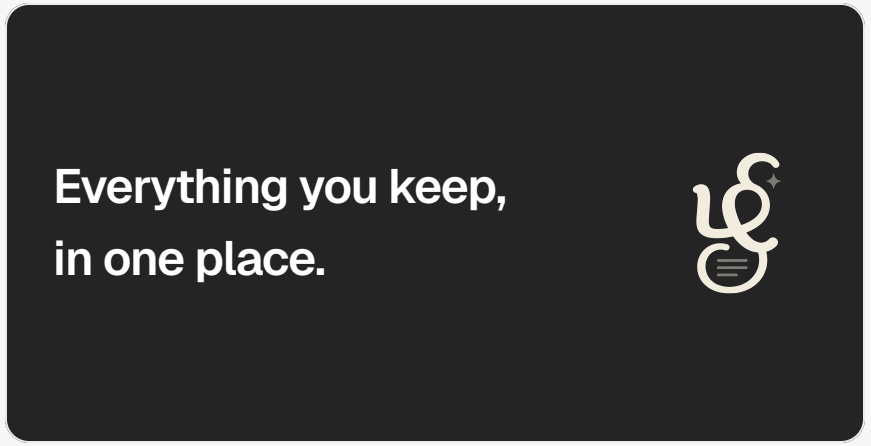

Naazhi

Square 1080 × 1080 and story 1080 × 1920. White, paper and dark grounds. Tight Geist headline, brand lockup. Avatar: **naazhi-app-icon-1024.png**.

069 Marketing Materials

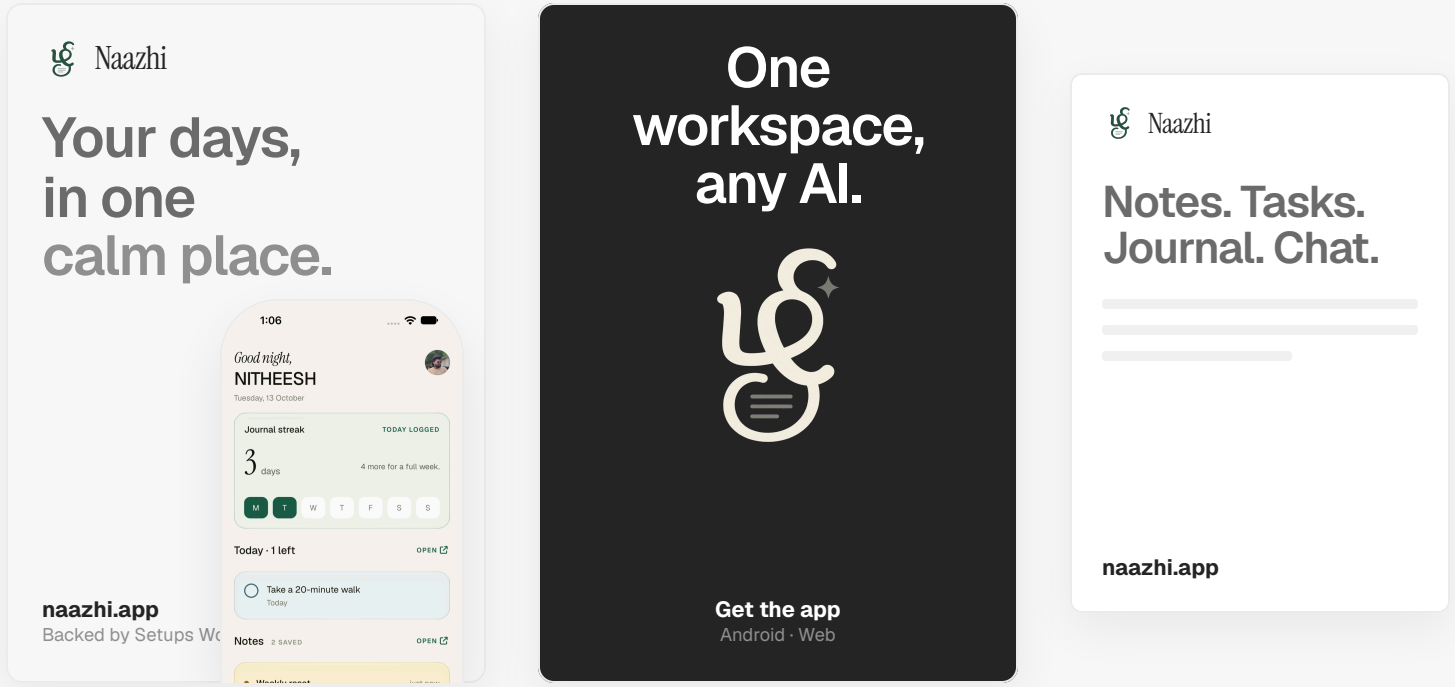

- Web banners: 1200 × 628 (link preview) and 300 × 250.
- One headline, one button, one phone.

- Always on white, paper or the dark fill.
- Store listings: app icon 1024, screenshots in a phone frame.

070 Posters & Flyers

A3/A4 posters and A5 flyers. A 20 mm margin, one headline, one phone, one web address.

071 Brochures

info@setups.works

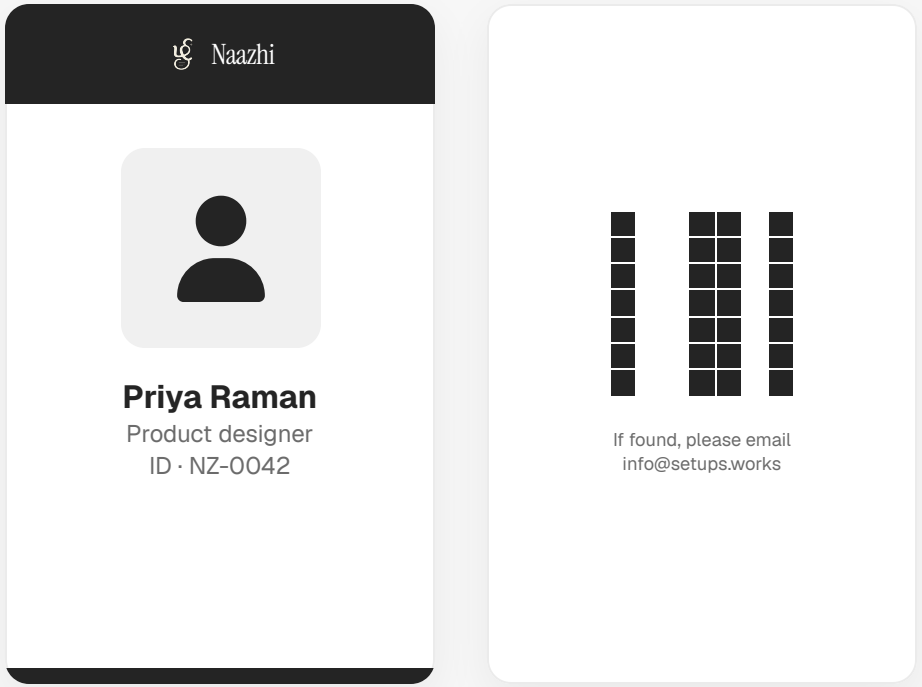

Naazhi

One workspace, any AI.

Tri-fold A4 landscape (99 + 99 + 99 mm). Cover with the lockup, three inside panels, a back panel with contact details.

072 ID Cards

Size	CR80, 85.6 × 54 mm, portrait or landscape
Header	Dark fill with the cream lockup
Details	Name in Geist 600, role in 400, photo on a neutral background

073 Merchandise

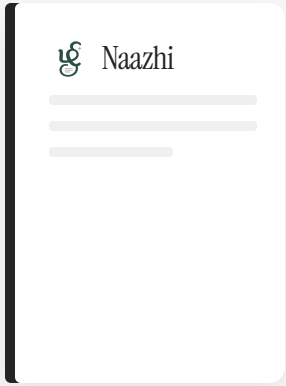

Paper tote

Dark mug

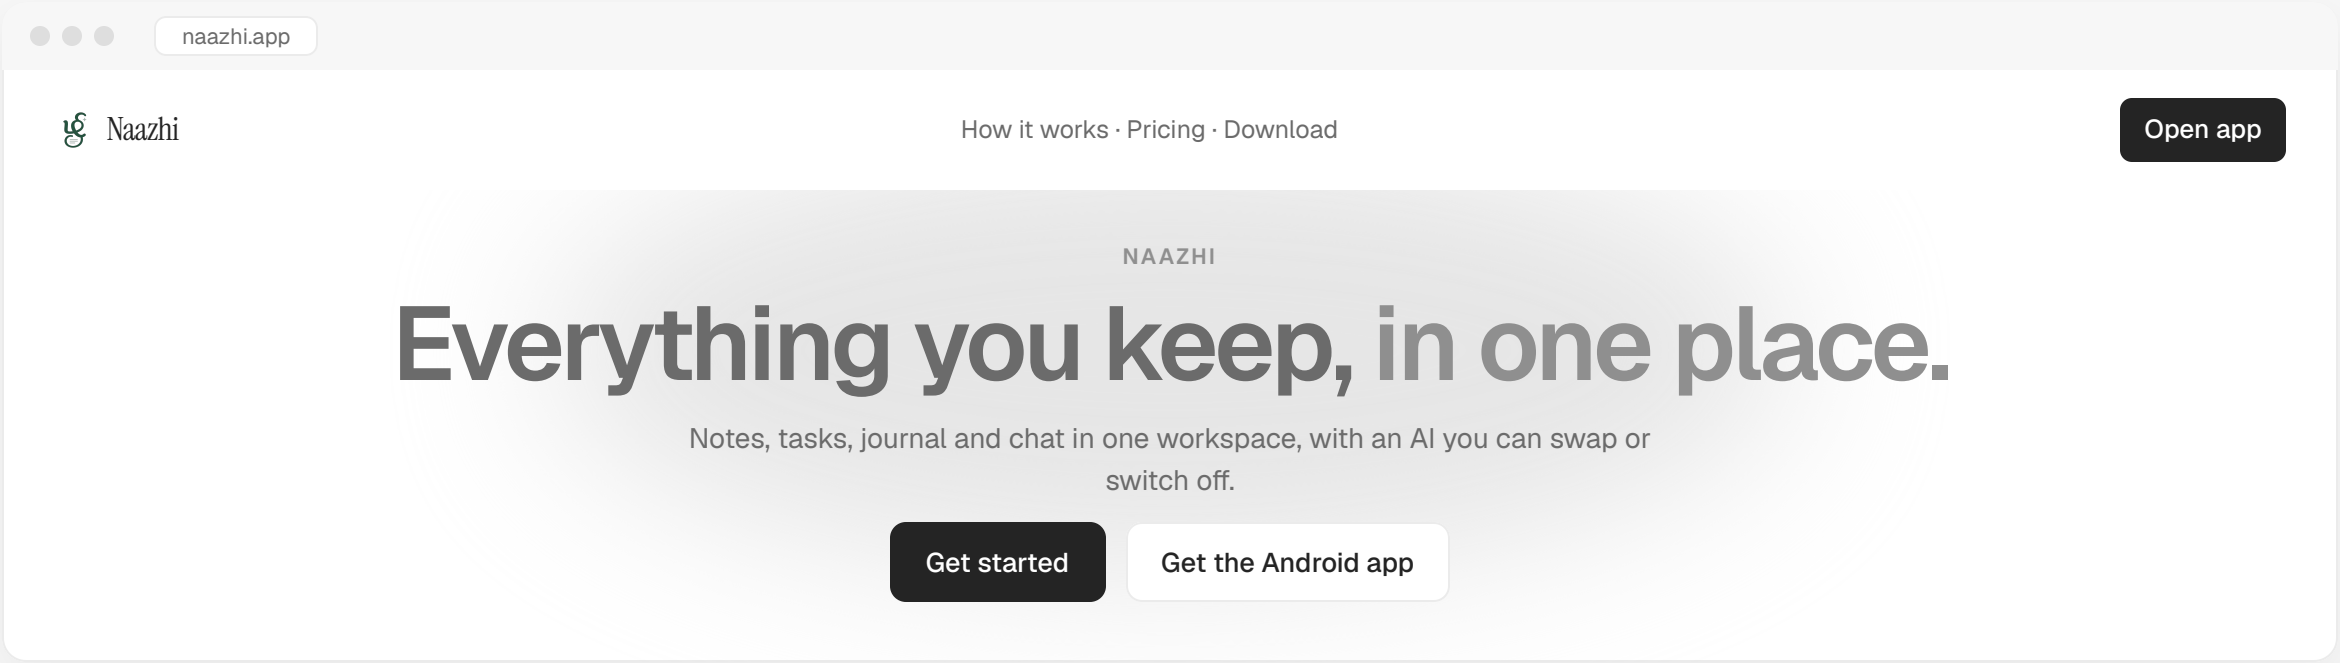

Dark tee

Notebook

Colours: paper, ink and Naazhi green. The mark alone, or the lockup. One colour print where possible. No slogans on merchandise.

074 Website Branding

- Two hosts: **naazhi.app** (website) and **dashboard.naazhi.app** (app and admin).
- White canvas, ink text, hairline borders, an ink panel for closing calls to action.
- Titles end in “— Naazhi”.

075 Website UI Guidelines

Layout

Max width 1120 px (940 px for list pages). Mobile first: every screen works at 375 px with no horizontal scroll.

Surfaces

Flat paper with a 1 px hairline border. Radii 4 / 6 / 8 / 12 / 16 px. Minimal shadows for floating layers only.

Motion

140–240 ms, ease cubic-bezier(0.2, 0.7, 0.2, 1). Respect reduced motion and the in-app setting.

Accessibility

Real buttons and links, labels, visible 2 px focus ring, keyboard for everything.

Dialogs and pickers

Use Modal, Menu, useConfirm(), usePrompt() and the site's own calendar. Never native alert, confirm or date inputs.

Tokens only

No raw hex that has a token. Enforced by `pnpm check:design` in CI.

076 Button & Component Styling

BUTTONS

Save Cancel +

TOGGLE AND TINTS

Work Home Study Filter

SEGMENTED CONTROL

Day Week Month

INPUT

Add a task…

CARD

Plan the week

Due tomorrow

Work

- **Primary**: dark rectangular button (8 px corners), 40 px, one per view.
- **Secondary**: flat white button with hairline border.
- **Icon button**: 36 px with 6 px corners and aria-label.
- Pressed state scales to 96 % with ease transition.
- Destructive actions confirm first, with danger styling.

077 App Icon

iOS · 1024 square (OS rounds the corners)

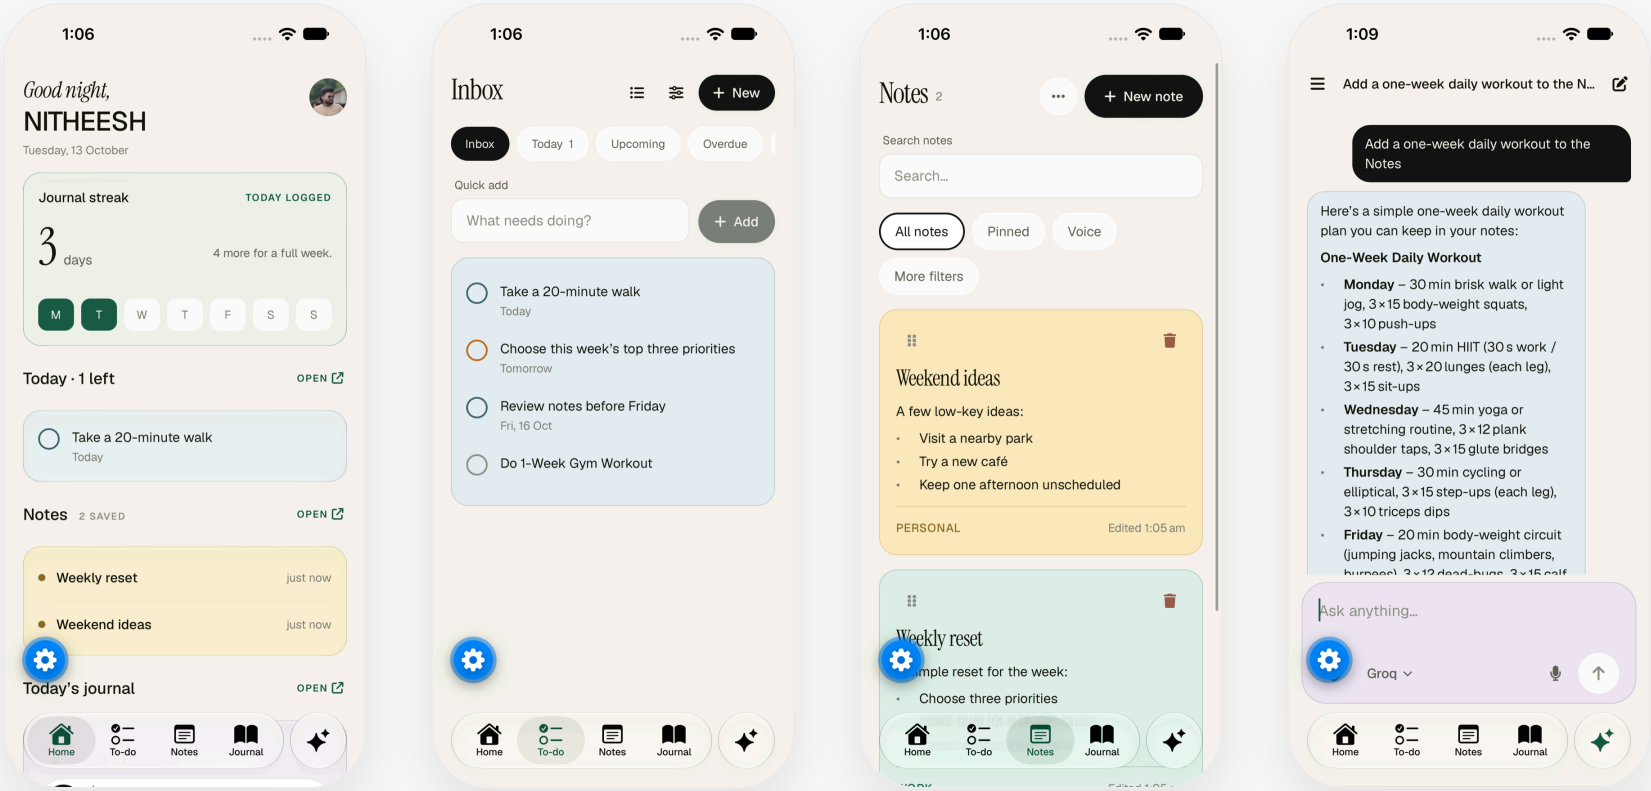

Android adaptive · mark inside the 66 % safe zone

Android themed (one colour)

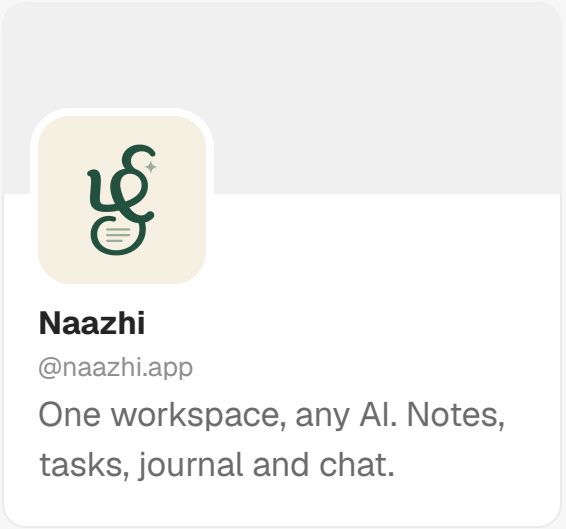

Mark fills about 66 % of the square, centred, on cream. Package / bundle id `com.setupsworks.naazhi`. Generate from the master with `scripts/brand/build-assets.mjs`.

078 Mobile Application Branding

- **Launch**: paper ground, the mark is drawn in about two seconds, then Naazhi appears. With Reduce motion on, the finished mark is shown still.
- **Top bar**: lockup at 28 px.
- **Home-screen widgets**: Today's tasks, Quick write, Health, Journal.

079 Social Media Profile Branding

Avatar

naazhi-app-icon-1024.png (the mark on cream).

Cover

Paper ground with the lockup left, Geist headline, one phone right.

Bio

“One workspace, any AI.” + one plain line + the link.

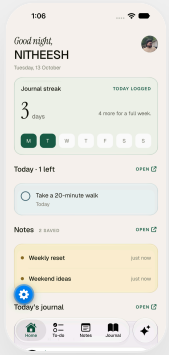

Handle

naazhi.app (lower case is for handles and addresses).

080 Digital Advertisement Guidelines

Your days in one calm place.

Get started

One workspace, any AI.

Download

Naazhi

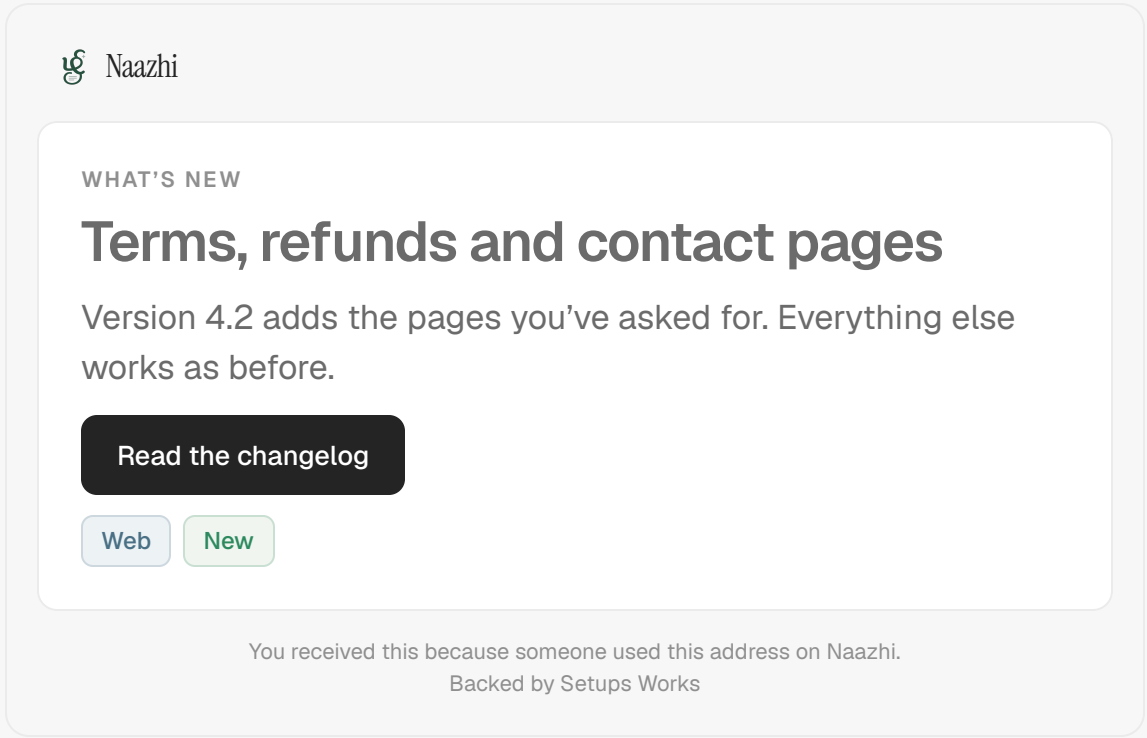

✓ Do

- One headline, one button, one phone or the mark.
- White, paper or dark fill grounds.
- Claim only what is built and documented.

✕ Don't

- Stock photos, gradients, emoji, countdown urgency.
- Fake reviews or numbers.
- Recolour or animate the mark.

081 Email Newsletter Design

- 600 px wide, off-white background, white content card with hairline border.
- Header: lockup at 28 px.
- One Geist title, one short paragraph, one dark rectangular button.
- Footer: “You received this because someone used this address on Naazhi.” and the Setups Works credit.
- Sender name: **Naazhi <...>**. Plain-sentence subject lines, no emoji.

082 Logo Usage Rules

✓ Do

- Use the supplied files, scaled proportionally.
- Keep the clear space of ½ the mark's width.
- Keep the mark at 16 px or more (24 px in a lockup).
- Use `BrandMark` in code, never your own <img>.
- Keep one logo per screen region.

✕ Don't

- Recolour, outline, add shadow or glow.
- Stretch, rotate, crop or redraw it.
- Place it on busy photos or low-contrast grounds.
- Animate the strokes apart (only the launch animation is allowed).
- Repeat the logo in a hero that already has it in the top bar.

083 Brand Asset Management

One source

Everything is generated from one master picture: `brand/source/naazhi-logo.jpg`.

One script

`node scripts/brand/build-assets.mjs` writes every PNG. Never edit them by hand.

Known places

Web: `apps/web/public/brand`. App: `apps/mobile/assets/images`. Print: `brand/exports`.

Versioned in git

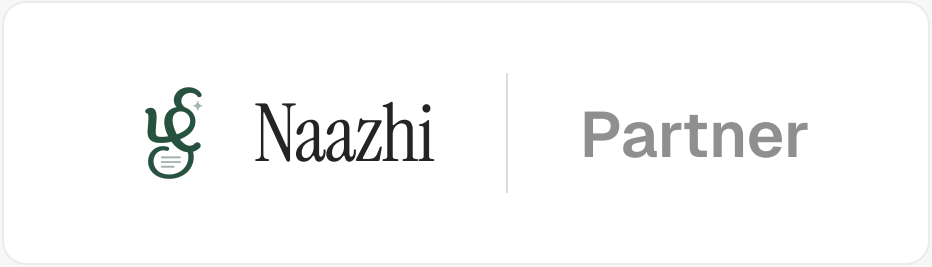

Changes go through a pull request. This book is rebuilt from the repository.

084 Third-Party Brand Usage

Other people’s names and logos appear only where they help someone.

- Show a partner’s or service’s logo (Google, Groq, Apple, Android) only to say a feature works with it, in their own approved form.
- Don’t imply endorsement, partnership or certification we don’t have.
- Store badges (Google Play, App Store) follow the platform owners’ rules. The App Store badge is shown as “coming soon” until the app is live.
- Keep the Setups Works credit as it is: “Backed by Setups Works.”, in footers and About, not in the header.
- Third parties who want to use the Naazhi name or logo need written approval (see Brand Approval Process).

085 Co-Branding Guidelines

- Place Naazhi and the partner side by side, separated by a thin vertical hairline.
- Both logos at equal optical weight; the clear space of each is respected.
- Naazhi’s lockup stays in its own colours on paper, white or dark. The partner keeps theirs.
- Never merge, blend, overlap or restyle the two logos.
- Co-branded copy follows the Naazhi voice and is approved by both sides.

086 Brand Consistency Rules

Tokens, never raw values

Colours, radii, shadows and fonts come from tokens. A new value is added once, then reused.

Enforced by tooling

`pnpm check:design` runs on every edit, in the pre-commit hook and in CI.

Same at 375 px

Compare any new screen with /dashboard/todo at desktop and phone width.

Same voice

Sentence case, curly apostrophes, no exclamation marks or emoji.

087 Brand Approval Process

1

Draft

Make it from this guide and the supplied files.

2

Self-check

Run the checklist: logo, colours, type, voice, 375 px.

3

Review

A second person reviews it (pull request for code).

4

Approve

The brand owner signs off new uses and co-branding.

5

Publish

Ship, and add reusable assets to the repository.

Contact the brand owner at info@setups.works for approvals and questions.

088 Brand Asset Download Links

LOGO

- Mark · green, transparent
- Mark · cream, transparent
- Mark on cream
- App icon 1024
- Master artwork

MOBILE ICONS

- Android foreground
- Android themed
- Splash mark

- To-do
- Notes
- Journal
- Chat

Links work in the HTML book. In the repository: `brand/exports`, `apps/web/public/brand`, `apps/mobile/assets/images`. Alternate Tamil-script logo concepts are in `assets/concepts` and are not part of the approved identity.

089 Brand Guidelines Summary

Calm, small, honest. Paper, ink, Geist.

Logo

Lockup, mark on the left, ½-mark clear space, 16 px minimum.

Colour

Paper canvas, ink text, hairline borders, muted tints for categories.

Type

Geist for all typography, Instrument Serif for the wordmark only.

Visuals

Real screens, flat hairline cards, crisp corners, Lucide/Font Awesome line icons.

Voice

Short, plain, warm. Sentence case. No hype.

Promise

Your AI can change. Your workspace shouldn’t.
